CAREER OBJECTIVE

Aspiring to build a career as a full-stack developer, working across both the front-end and back-end of real applications. Enjoys the whole process from designing an interface that feels intuitive, writing the logic that makes it actually work, and connecting it all to a database that holds up under real use. Hands-on experience with Java, Python, JavaScript, SQL, and frameworks like React, Node.js, and Express, built through academic projects and an IT support role. Looking to bring that experience into a professional team, take on real ownership across the stack, and keep growing as a developer through practical, hands-on work.

EDUCATIONAL BACKGROUND

BSc (Hons) Computing

2024 – Present

Islington College, London Metropolitan University

Kamal Marg, Kamalpokhari, Kathmandu

Cambridge GCE A-Level

2022 – 2024

Global College International, Cambridge Assessment International Education (CAIE)

Baneshwor, Kathmandu

Secondary Education Examination (SEE)

2022

Aksharaa School, National Examinations Board (NEB)

Kandaghari, Kathmandu

WORK EXPERIENCE

IT Support Intern

Jan 2025 – Mar 2025

Maxima Multinational Trading Pvt. Ltd.

- Supported the company's IT systems day to day and learned how their surveillance software worked, including how to monitor it, configure it, and fix issues when things went wrong.
 - Made posters and digital designs for the company's social media pages, which helped keep their online presence looking consistent and put-together.
-

SKILLS

Technical Skills

- **Programming Language:** Java, Python, SQL, HTML, CSS, JavaScript, C++
- **Operating Systems:** Windows, Linux, macOS
- **Tools and Software:** Git & GitHub, Eclipse, Visual Studio Code, Figma, MySQL Workbench, MS Office, Canva
- **Framework:** Node.js, Express.js, React.js
- **Concepts:** REST APIs, MVC Architecture, Database Design, Responsive Web Design, PostgreSQL

Soft Skills: Communication, Teamwork, Leadership, Critical Thinking, Time Management, Problem Solving, Adaptability

ACADEMIC PROJECTS

[Gym Membership Management System](#) | *Java*

Built a desktop application to handle gym operations such as member registration, attendance, membership plans, and billing so that the staff didn't have to track everything on paper or spreadsheets.

[Skin Care Product Sales System](#) | *Python*

Made an application to manage a skincare business's products, customers, and sales records in one place, making it easier to see what was selling and keep customer details organized.

[Timeless Ticks: Watch E-Commerce Website](#) | *HTML, CSS, JavaScript*

Worked with a group to build a responsive website for a watch brand, focusing on making the product pages look clean and the whole site easy to browse.

[Finora: Plant & Aquarium E-Commerce Website](#) | *Java, JSP, Servlets, MySQL*

Part of a team that built a full-stack e-commerce platform for plants and aquarium products, handling backend logic with Java servlets and JDBC while contributing to front-end features.

[Network Traffic Data Analysis](#) | *Python*

Cleaned, visualized, and analyzed a real network traffic dataset, looking for patterns that weren't obvious from the raw data.

[Art Sphere: Art Gallery Website](#) | *HTML, CSS, JavaScript*

Helped build a responsive website for an art gallery as a group project, focusing on the front-end development and UI/UX design of the tutorials page.

PERSONAL PROJECTS

[RentEase: Full-Stack Apartment Rental Platform](#) | *React, Node.js, Express, MongoDB, JWT*

Built a full-stack rental marketplace connecting tenants and landlords. The project has react frontend backed by a MongoDB API with JWT authentication.

[Coffee Cat: Café Website](#) | *HTML, CSS, JavaScript*

Took a website template and rebuilt parts of it into a proper site for a café, adjusting the layout, styling, and interactivity so it actually felt like the café's own website rather than a generic template.

[Portfolio Website Design](#) | *Figma*

Designed a complete portfolio website in Figma, focusing on layout, typography, and visual hierarchy to represent the sections clearly. Prioritized a clean structure so the design could later be built out as an actual working website.

AWARDS / ACHIEVEMENTS

- [AWS Academy Graduate – Cloud Foundations](#)
 - [AWS Academy Graduate – Data Engineering](#)
 - [AWS Academy Graduate – Machine Learning for Natural Language Processing](#)
 - [AWS Academy Graduate – Machine Learning Foundations](#)
 - [LinkedIn Learning – Java Object-Oriented Programming](#)
